

HAZARDOUS DRUG GUIDE

(H) is an indicator that the medication is HAZARDOUS depending upon the level of altering (cut, split) and appropriateness of engineering controls (closed or open system for altering)

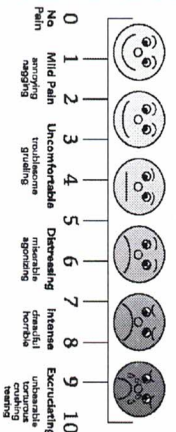

Universal (GREEN) - handling and disposal of using normal precautions.

Low (YELLOW) - handle at all times with gloves and appropriate engineering controls.

Moderate (ORANGE) - handle at all times with gloves, gown, eye and face protection (with splash potential) and appropriate engineering controls.

High (RED) - handle at all times with double gloves, gown, eye and face protection in addition to any necessary engineering controls.

PAIN Scale

Behavior/Intervention/Outcome

Psychopharmacological Medication Monitoring

Behavior Mgmt Intervention (BMI)

Result/Outcomes

Medication side effects (MSE)

- (A) offer/assist to restroom
(B) offer food/fluid
(C) redirection
(D) positive reinforcement
(E) offer music/activity
(F) medication offered
(G) other _____
(H) other _____

- N = not observed
E = effective
I = ineffective
M = medication
intervention

- A) sedation/drowsiness
 - B) dizziness C) constipation
 - D) weight gain/edema
 - E) seizures F) urinary retention
 - G) tardive dyskinesia
 - H) cognitive behavior impairment
 - I) orthostatic hypotension
 - J) unsteady on feet/fall
 - K) high blood sugar
 - L) other _____
- N/A - not applicable

[illegible]
